

ORGANISATIONAL RESTRUCTURE & CHANGE MANAGEMENT CONSULTANCY

Organisational performance ultimately rests on human behaviour and improving performance typically requires new structures, systems and processes to drive behavioural change. The need to adapt and change is now a constant for all organisations.

Effective organisational design is about more than the structure alone – and should be based on the foundation of the organisation's strategy. A number of other elements are vital to success. These include strategic and business planning, leadership, decision-making and structure, work processes and systems, people and culture. All these elements work interdependently to support high-performing organisations.

CHANGE MANAGEMENT

Price Consulting Group uses a structured approach to support the organisation and its people through the transition from the current way of operating to the future state. We help organisations and their people adjust to change, whether it is a new organisational structure, a strategic direction that depends on the understanding and support of stakeholders, a new service delivery model, or the introduction of new technology and work processes.

Our proven Organisational Change Management approach;

- 1 Assess the current state, prepare and develop for the future state.
- 2 Communicate and consult extensively with all stakeholders involved in the change program.
- 3 Implement the change, and ensure that the change is sustained.

There is no "one-size fits all" solution – every structure has its strengths and weaknesses. However there is likely to be an option to improve your existing structure. We undertake extensive analysis of your key deliverables and challenges, which helps to determine alternative structures that will support the strategy. The final structure is likely to be a hybrid of the "best" options developed – often compromises in the structure are necessary in order to balance the organisation's strengths and weaknesses. Whatever structure is selected, it is essential that these trade-off's are identified and managed.
